

Making healthcare services **smarter**

Nanjing Health Information Center

Nanjing Health Information Center (NHIC) is the central IT service provider for Nanjing Sanitation and Health Commission, managing the organization's IT applications, data centers, and network. To deliver on the central government's strategic healthcare initiatives, such as the 12320 Health Hotline and mobile payment for medical insurance, NHIC relies on Lenovo technology. Its mission-critical healthcare, patient record, and billing systems all run on Lenovo ThinkSystem SR650 servers, ensuring top performance and the smooth running of IT systems at hospitals, health centers, and clinics across Nanjing. Furthermore, Lenovo provides an annual inspection service, delivering a report that NHIC uses to guide the operation and maintenance of the infrastructure.

Lenovo After-Sales Support

“Our entire IT landscape—including our database, HCI, PACS, storage archive, and scientific research platform—has been running on Lenovo technology for four years now, and we have never experienced a single issue. As well as the top-level design of our data center, the ThinkSystem SR650 servers delivered by Lenovo run reliably and provide excellent performance for everything from our core systems to innovative services such as mobile medical insurance payments.”
