

Securing the production of vital medicines

Zhendong Pharmacy Company

Zhendong Pharmacy Company manufactures huge volumes of both Western pharmaceutical products and traditional Chinese medicines each year. To keep production on track, the company relies on more than 90 business applications on 100 virtual machines running reliably 24/7. To future-proof operations, Zhendong Pharmacy Company replaced its aging IT infrastructure with Lenovo ThinkSystem SR860 V2 and SR650 servers for its core SAP landscape, and Lenovo ThinkAgile VX Series hyperconverged infrastructure for its virtualized environment—delivering improved performance, easier resource management, and better scalability to keep production lines rolling.
